

Assignment 1 - Stinger Set Design

Kristian Howald, 2021

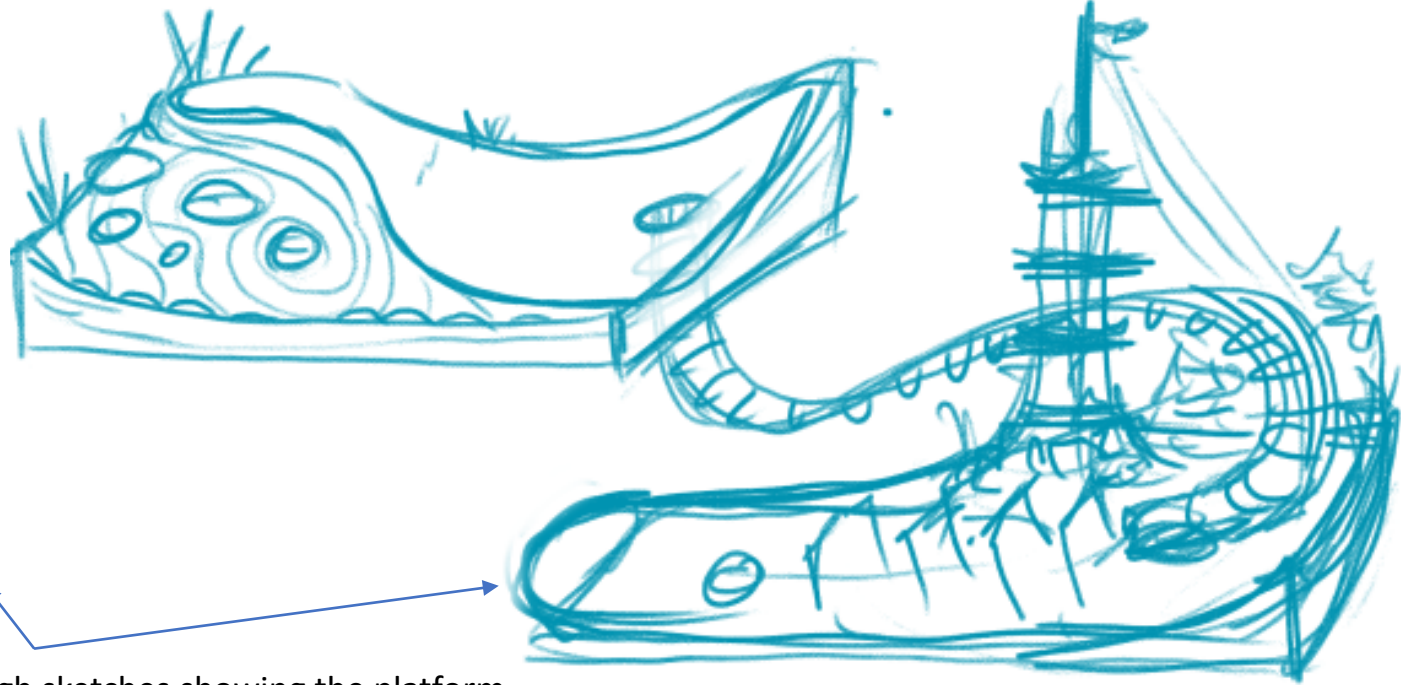

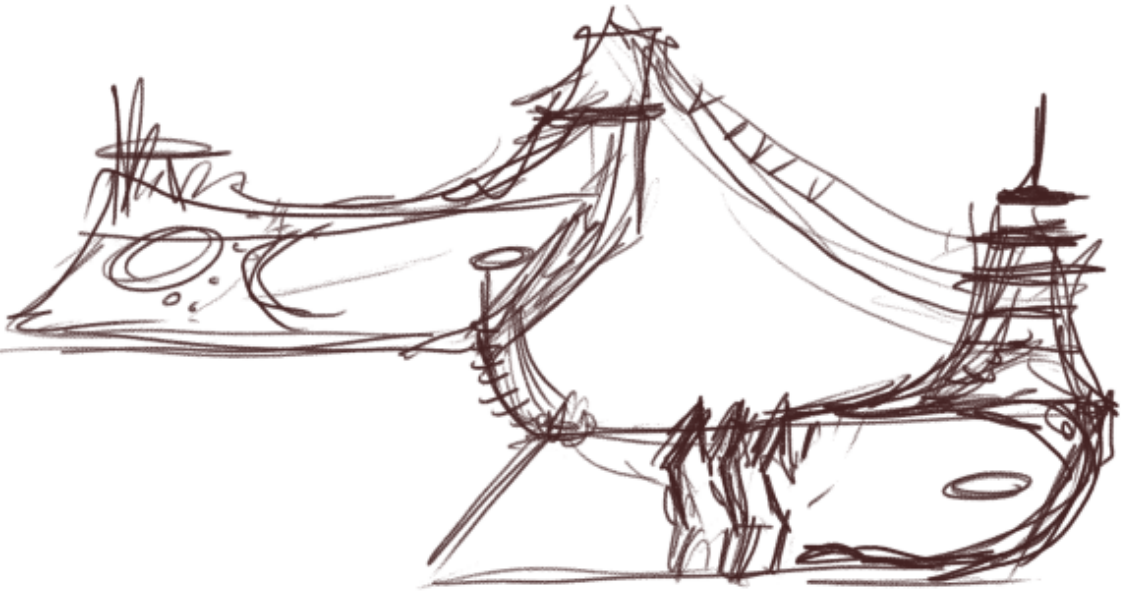

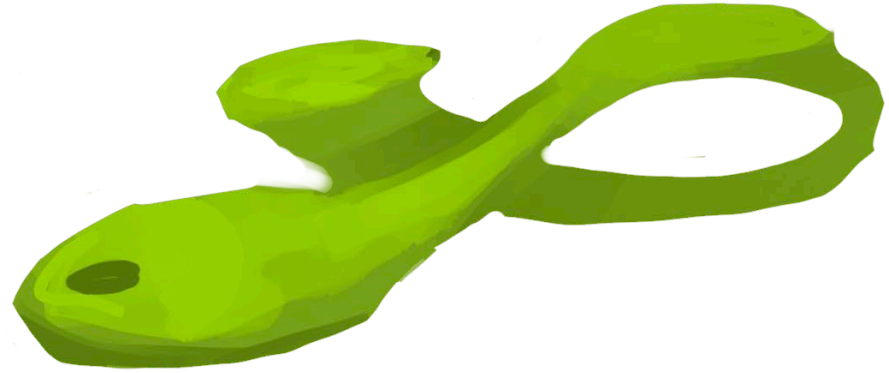

Mood board

I would like to play with the idea of **scale** for my mini-golf course. I'm drawing on influence from **Japanese architecture** and **gardens**. The ball starts on a platform that feels more **Zen** garden like. As it moves to the lower platform, I would like to create a feeling of an expansive landscape by forcing perspective and adding in a miniature building based on the **pagoda** style of architecture. I would like to use motifs from the roof lines to shape the greens of course. I really like the simplicity of **Ângelo Fernandes** style, which I'll incorporate into the colors on overall shapes.

Rough Sketches

Exploring shapes for the course.

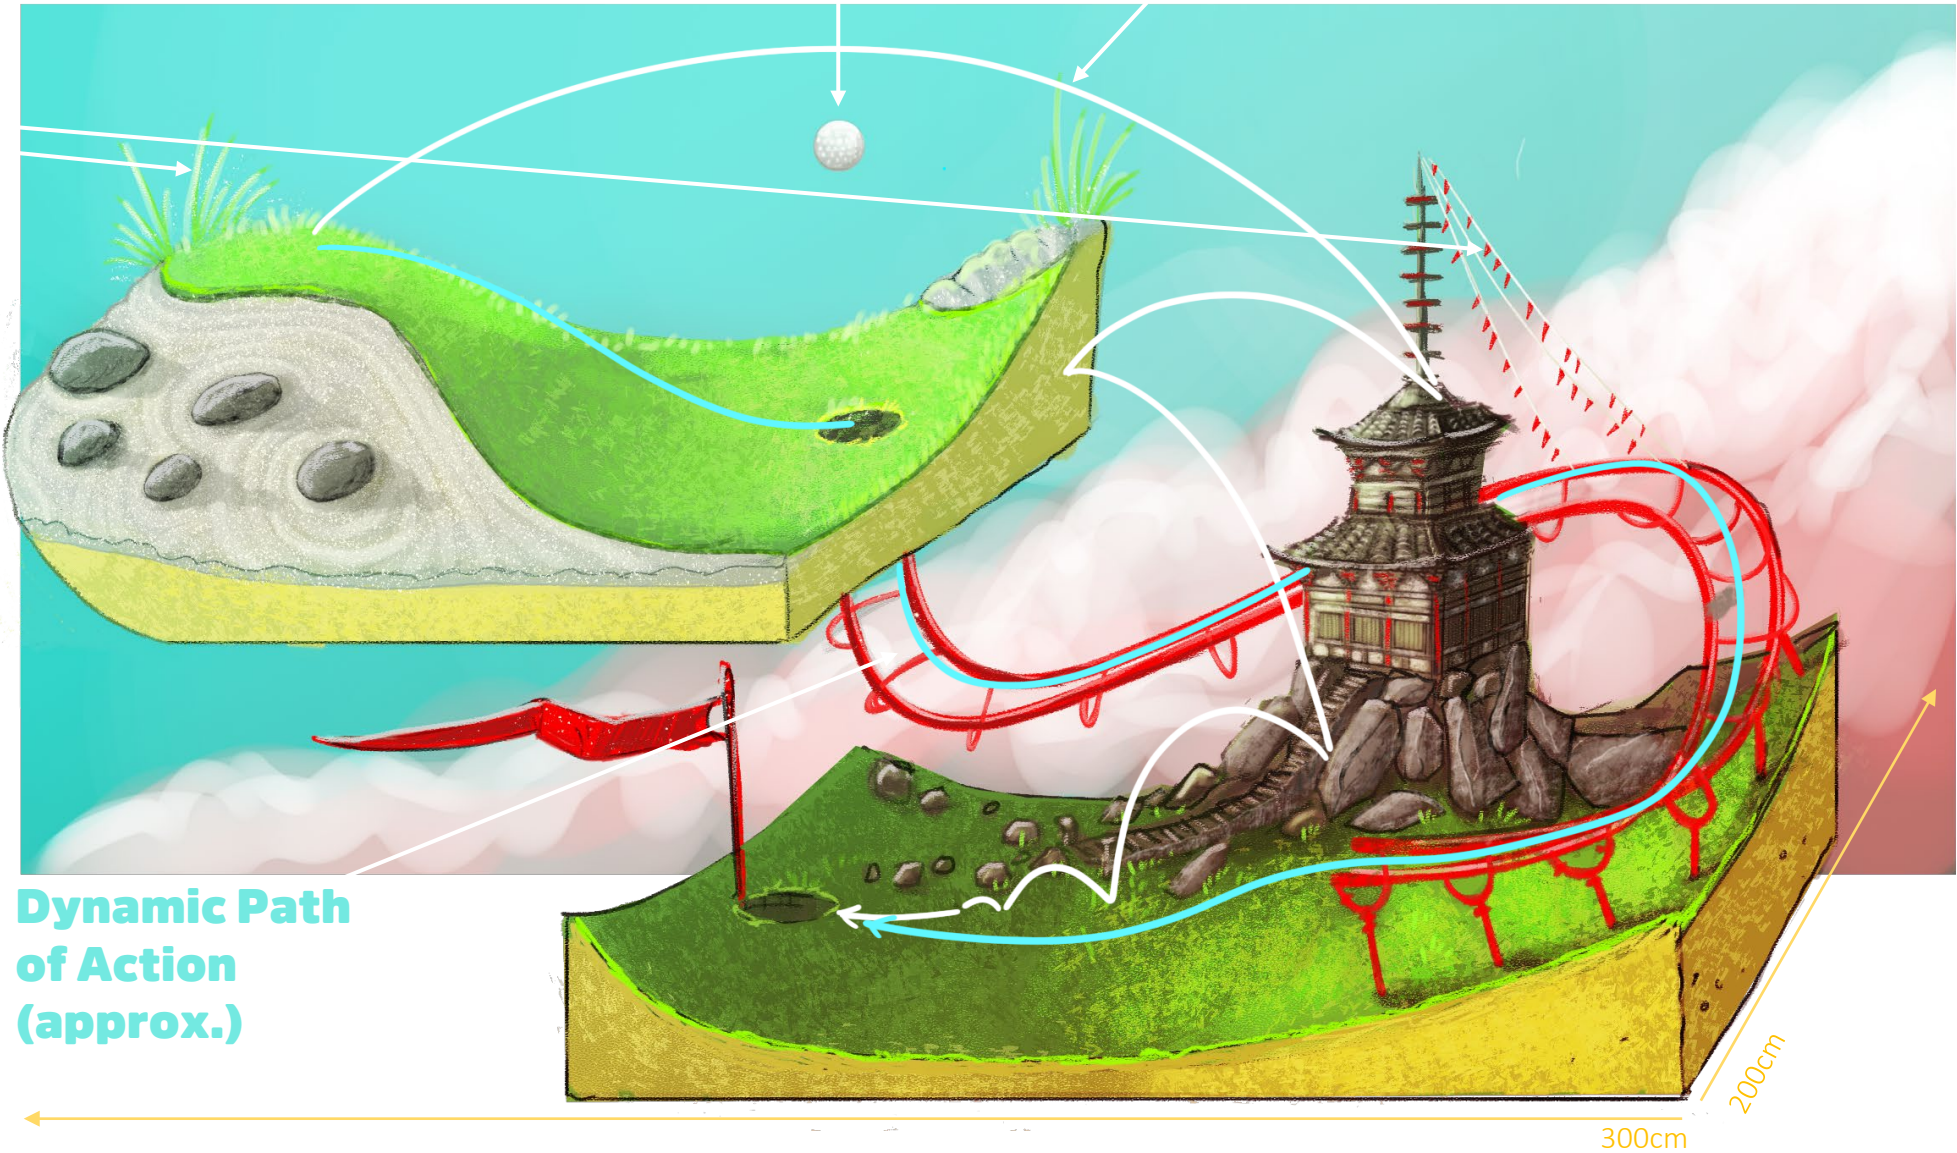

Rough sketches showing the platform structure and initial building placement.

Final Design

Golf Ball

Keyframe Path of Action (approx.)

Expression Driven
